

[APPLAUSE]

GUEST SPEAKER: Thank you.

[APPLAUSE]

AUDIENCE: What [INAUDIBLE] did you guys use different color LEDs?

GUEST SPEAKER: We used new pixel.

AUDIENCE: To add the color?

GUEST SPEAKER: Yeah. As well as a couple of other ones and then we--

AUDIENCE: [INAUDIBLE]?

GUEST SPEAKER: Yep.

AUDIENCE: I don't know if this is a question you guys can answer, but do you guys think that if the paper, the surfaced in which things are being projected through or reflected is either red, blue, or green, could you hide some things and show some others, you know what I mean?

GUEST SPEAKER: To an extent, I think. But it depends also what kind of material you would use.

AUDIENCE: Right.

GUEST SPEAKER: To an extent, but it wouldn't be as effective as basically using the codes that turn on and off.
[INAUDIBLE] Yeah.
