

AUDIENCE: That was awesome, but my card was stolen.

[LAUGHING]

GUEST SPEAKER So this is the Soil Moisture Inversion Level Estimator, or SMILE, for short, and it will keep your
1: plants happy.

GUEST SPEAKER By telling you when your soil is too wet, too dry, or just right. So it uses an RGB LED, and any
2: soil moisture sensor.

GUEST SPEAKER And here's how it works,

1:

GUEST SPEAKER So just water turns blue, and that's too wet.

2:

GUEST SPEAKER It says "Gone Fishing" in the silly monitor.

1:

[LAUGHING]

GUEST SPEAKER Moist soil will turn green if you stick it in all the way. And then it says-- what does it say?

2:

GUEST SPEAKER I feel good.

2:

GUEST SPEAKER I feel good, so you don't need to water your plant. And then completely dry soil is red, and it

2: says--

GUEST SPEAKER I'm thirsty.

1:

GUEST SPEAKER Water me, I'm thirsty.

2:
